1 Introduction

This document provides an overview of the enhancements to the T7 XML Reports that will become effective with the introduction of T7 release 14.0. This modification announcement outlines changes as compared to T7 release 13.1. The associated T7 XML Report manual version is 1.

2 New Reports

The following chapter outlines the new reports introduced with T7 Release 14.0.

2.1 RD280 Sponsored Access Unit Maintenance

Description This report provides an overview of all the changes made to a sponsored Access Unit set up by the Business Unit.
This report is available only for derivative market.

Frequency Daily.
Availability Member Report.

2.2 RD285 Sponsored Access Unit Status

Description This report provides an overview of Sponsored Access Units set up by a Business Unit.
This report is available only for derivative market.

Frequency Daily.
Availability Member Report.

2.3 TD958 Advanced Building Block Performance Report

Description This report shows the month-to-date (MtD) performance in the Advanced Building Block. It consists of two parts; the actual rebate percentage gained from the spread and size quality as well as a breakdown of the spread and size quality per expiry. The call-put indicator and the delta bucket are provided for easier troubleshooting of quotation.
This report is available only for derivative markets.

Frequency Daily.
Availability Member Report.

2.4 TD959 End of Day scope Delta Strike Window

Description This report shows the daily requirement of the Basis Building Block especially the breakdown per expiry / strike range for all Delta Strike Price windows in use. The purpose of the report is the reconciliation between the Eurex delta requirement and the member's internal systems. The report is public as it contains only the requirement, not the coverage perspective. For each expiry in scope, it shows strike range per time interval the quotation period.
This report is available only for derivative markets.

Frequency Daily.

Description This report lists the appropriate fee for each OTC Trade Upload of the trading member. This report is only available for members of T7 Boerse Frankfurt, which are eligible for OTC Trade Uploads.

Frequency Daily.

Availability Member Report

3 Changes to display of numeric and numeric signed fields in dedicated reports

Deutsche Börse is migrating its data platform for the provision of XML reports to a new technology stack. With this migration Deutsche Börse is enhancing its data platform in terms of performance. Increased transaction volumes are one of the key drivers for this migration.

During this migration, an adaptation to the content display of numeric and numeric signed fields with decimals will take place: In case there are only zeroes as decimal places, the decimal places will not be explicitly stated:

General Field Format	Format Description for example	Old Format Example	New Format Example
numeric $n [, m]$	numeric signed 5, 2	314.15 3.14 2.00 0.00	314.15 3.14 2 0
numeric signed $n [, m]$	numeric signed 5, 2	+314.15 -3.00 +0.00	+314.15 -3 +0

The migration will take place as a stepwise approach. Each new release, further reports will be migrated onto the new platform.

The reports listed below will be published with the new format for numeric/numeric signed fields starting with T7 release 14.0:

- TC230 Cross and Quote Requests
- TC812 T7 Daily Prevented Self-Matches
- TD930 Daily Trade Statistics
- TD965 Specialist State Change
- TE535 Cross and Quote Requests
- TR902 Daily Order and Quote Transactions
