7 Reformatted Report Text Layouts

With T7 8.0 the text layout of many reports got reformatted. This reformatting means *no changes in content* but minor changes in formatting. Since the reformatting does not concern the content and since many reports are concerned in many minor details, we do not list all these changes in detail but point your attention to the various types of format changes.

NB: Not all reports have been reformatted according to these rules. Especially reports with a complex text layout structure may still follow different formatting rules.

- Changes in alignment:
 - Headlines are center-aligned in the first line of a headline group. In all following headlines of the same headline group, the headlines for text fields are left-aligned and the headlines for number fields are right-aligned.
 - The alignment of values under headlines is left-aligned for text fields resp. right-aligned for number fields.
- Changes in lengths and breaks:
 - The line break in a series of values under a common headline may be set at another place than before.
 - The length of the underlining of headlines may have changed.
 - Trailing spaces at the end of lines may have vanished.
- Changes in field headlines:

These changes concern e.g. a different usage of capital and small letters, or correcting typos, or choosing a different way to abbreviate the field name. Some examples:

 - “OrigFirm” => “OrgFirm”
 - “BidPrc” => “Bid Price”
 - “BU Respondend” => “BU Respondent”
 - “Num of Respondents” => “Number of Respondents”
