

JOINT PRESS RELEASE

by the Financial Supervision Commission and BSE-Sofia

The unanimous position of the Financial Supervision Commission and BSE-Sofia is that the distraint of all shares of Aroma AD-Sofia does not take into thorough consideration the requirements of the active legislation. The measure on its own hurts the interest of the investors and is not focused on any property of the public company. Since this is not the first case of imposing a distraint on shares held by persons, who have nothing to do with a lawsuit, party on which is a public company, both institutions will take the necessary measures and will inform the respective public authorities about the confusion caused and the consequences.
