

PRESS RELEASE FROM BSE-SOFIA

in connection with the upgrade of the trading system to Xetra Release 9.1

BSE-Sofia would like to remind its members that on 24.11.2008 the trading system will be upgraded to Xetra Release 9.1. The new version of the Xetra trading system together with an installation guideline will be available on the web site of the Exchange at http://www.bse-sofia.bg/download/BSE_Client/Xetra91-Production/ on 21.11.2008 after 2:00 p.m.

The new software may be installed on 24.11.2008 before the start of the trading session, but BSE-Sofia recommends this to be done either on 22.11.2008 or on 23.11.2008.

Xetra Release 9.1 functionalities are not different from the system used at present. Even so, its installation is absolutely necessary, because otherwise the Exchange member will not have an access to the trading system!

For more information, please contact Information Technologies Directorate at +359 2/ 4001 449 and Trading Directorate at +359 2/ 937 09 41; 42; 44 or 33.
