

PRESS RELEASE FROM BSE-SOFIA

in connection with the upgrade of the trading system to Xetra Release 10.0

BSE-Sofia would like to remind its members that on 08.06.2009 the trading system will be upgraded to Xetra Release 10.0. The new version of the Xetra trading system together with an installation guideline will be available on the web site of the Exchange at http://www.bse-sofia.bg/download/BSE_Client/Xetra100-Production/ on 05.06.2009 after 4.00 p.m.

The new software may be installed on 08.06.2009 before the start of the trading session, but BSE-Sofia recommends this to be done either on 06.06.2009 or on 05.06.2009 at the end of the working day.

On 06.06.2009 in the time frame between 3.00 p.m. and 5.00 p.m. each of the BSE members may test the connection with the system. In order the test to be considered successful in the "Message log" window should appear the message "Xetra Release 10.0".

Xetra Release 10 functionalities are not different from the system used at present. Even so, its installation is absolutely necessary, because otherwise the Exchange member will not have an access to the trading system!

For more information, please contact Information Technologies Directorate at +359 2/ 4001 449 and Trading Directorate at +359 2/ 937 09 41; 42; 44 or 33.
